Education

Indian Institute of Information Technology, Ranchi — **Ranchi, Jharkhand**
Bachelor of Technology in Electronics and Communication Engineering; CGPA: 8.01/10 — *2024 – 2028*

Technical Skills

Languages: JavaScript, TypeScript, Node.js, Python, C++, C, SQL
Frameworks & Libraries: Express.js, React 19, Sequelize ORM, Prisma ORM, Zod
AI & Real-Time Systems: OpenAI Realtime API, Google Gemini Flash, WebRTC, Deepgram
Databases & Messaging: PostgreSQL, MySQL, MongoDB, RabbitMQ
Tools & Infrastructure: Turborepo, Bun Workspaces, Stripe, Razorpay, Cloudinary, Multer, JWT, Nodemailer, Git, GitHub
Domains: Distributed Systems, Microservices Architecture, Real-Time Communication, RESTful API Design, Full-Stack Development
Coursework: Data Structures and Algorithms, Python, Operating Systems, OOPs, Computer Architecture and Organization

Experience

CODLY INDIA PVT. LTD. — **Delhi, India**
Software Engineering Intern — *May 2026 – Present*

- Programmed responsive frontend interfaces for 3 core web application modules using Laravel Blade, implementing structural optimizations that boosted SEO score from 80 to 97.
- Designed 15+ RESTful API endpoints within the Laravel backend to securely handle user authentication, complex form submissions, and data fetching.
- Managed repository workflows with 40+ Git commits and raised 15+ pull requests, rigorously integrating feedback from senior developers to ensure high-quality code.

Projects

AI Interviewer — GitHub | Live Demo — **June 2026 – July 2026**

- Architected an end-to-end voice-based AI interview platform using a Turborepo monorepo with Bun Workspaces, automating candidate profile parsing, real-time voice interaction, and structured evaluation reports.
- Integrated OpenAI's Realtime API via WebRTC and a custom Express.js signaling proxy, alongside a dual WebSocket pipeline utilizing Deepgram for real-time speech-to-text transcription and Prisma ORM with PostgreSQL for transcript synchronization.
- Executed a multi-model AI evaluation system powered by Google Gemini Flash to analyze transcripts and generate candidate scores, enforcing strict JSON output contracts using Zod schema validation.

Airline Booking System — GitHub — **March 2026 – May 2026**

- Constructed a scalable 4-service microservices backend using Node.js, Express.js, and 4 isolated MySQL relational databases, implementing a layered MVC architecture across 15+ RESTful API endpoints.
- Mitigated race conditions during high-concurrency bookings using ACID-compliant distributed transactions and idempotent logic, decoupling communication via synchronous Axios APIs and 1 event-driven RabbitMQ message queue.
- Built a robust security and automation layer featuring JWT-based authentication, RBAC via Sequelize ORM, and 1 asynchronous node-cron worker processing and dispatching automated SMTP email notifications.

Leadership and Extracurricular

- **Training and Placement Coordinator:** Managed recruitment drives facilitating placements with 10+ corporate companies and 300+ student participants.
- **Competitive Programming Coordinator:** Guided and mentored 200+ students in advanced data structures and coding algorithms in House of Geeks.
- **Inter-IIIT Sports Meet:** Represented IIIT Ranchi as a table tennis player, securing a national 7th rank among participating institute teams.

Achievements

- **Engineers' Ring of Honour:** Ranked **11th nationwide** among 50,000+ participants (top 0.02%) in a national engineering assessment. Certificate
- **Hackathon Winner:** Secured **1st place** at Quasar X AI, a 24-hour AI hackathon organized by IIIT Ranchi, competing against 50+ teams.
- **Flipkart Grid 8.0:** National Semi-finalist competing against 1.6lakh+ total participants.
- **Competitive Programming:** CodeChef **3-Star** (Max: 1603, **Rank 79** in Starters 231) | Codeforces **Specialist** (Max: 1521, **Rank 832** in Round 1107) | Solved **1000+** problems.
